

The Friends of East Cobb present:

# The 5 Woman Approved Health Secrets About Breasts

**Tuesday April 16 at 7:00PM**  
**4965 Fairhaven Way, Roswell**

Would you rather prevent cancer, or fight the cancer? Today's conventional standard of care does not give you the information and tools you need to actually prevent getting breast cancer. Join Ronna and learn:

- How simple lifestyle and diet actions can significantly decrease your risk of getting breast cancer. By as much as 300% in most cases.
- The difference between a mammography and thermography and why both are important.
- The importance of using early assessment tools to learn your risk level early enough so that you can do something about prevention.
- The unspoken truth about breast cancer statistics.
- How you can discover and deal with underlying causes that may be putting you at a higher risk of getting breast cancer.
- And more...

Ronna will change how you think about your breasts and your health.

## About the Speaker

Ronna Dermitt spent 23 years imaging breasts using mammography. She often wondered, "How can I help these women who come in year after year for imaging and then one day end up with breast cancer?" After many years of research and training as well as experience in integrative care, Ronna has become savvy on the topic of preventing breast cancer. She is an engaging, energetic speaker sharing vital advice on breast health. She brings to light the misconception most women have that today's conventional standard of breast care is actually preventing breast cancer. She'll share with you the best kept secrets on what you really need to know to prevent getting cancer in the first place.

*Ronna Dermitt, a Certified Lifestyle Educator, is a practitioner with Alternative Health Atlanta. Ronna was an x-ray technician for 23 years before she decided to move into integrative care where she was exposed to thermal breast imaging. She was directly trained in thermal breast imaging by Alex Mostovoy, an IACT certified thermologist. She has been providing thermography services and lifestyle educationsince 2008.*
